800-279-4441

OTHER MATERIALS

- Sandpaper

1. MARK THE PIECES

Use a compass and a combo square to mark the shapes you will cut onto your stool components. The form of these cutouts is up to the builder.

2. CUT THE SHAPES

Use a handheld jigsaw to cut the shapes into the stool parts. Clamp them in place while you cut to ensure accuracy and safety.

3. BEGIN BORING THE HOLES

Using a pocket-hole jig, bore the holes at the ends of each stretcher. These joints will join the legs to the stretchers.

4. COMPLETE THE DRILLING

In the same way, bore the holes that will attach the stretchers to the top of the stool. Again, clamp the pieces securely as you drill the components.

5. ATTACH THE LEGS

With the long driver bit provided in the pocket-hole kit, drive screws through the stretchers into the legs of the stool.

6. FINAL ASSEMBLY

Complete the assembly by screwing the top to the stretcher. Then sand the stool smooth and apply your finish of choice.

The builder can vary the shape of the stool's top and the cutouts in the legs of the stool. No glue is required for the assembly of the stool.

MATERIAL LIST

	T x W x L
1 Top (1)	3/4" x 9 1/4" x 15"
2 Legs (2)	3/4" x 9 1/4" x 9"
3 Stretchers (2)	3/4" x 3" x 11"
